Group of Companies
JSC Trust
«NefteGazVzryvPromStroy»
Basic types of works performed by Joint Stock Company Trust «NefteGazVzryvPromStroy» (Trust «NGVPS» JSC) are as follows:

- Drilling and blasting operations in rocky and eternally frozen ground, in open-cast mines, excavations at construction of pipelining, highways;
- Drilling and blasting operations when excavating;
- Take down of metal constructions (containers, gas storage tanks, pipes, etc.)
- Direct decay of buildings and chimneys;
- Break down of brick, concrete and ferroconcrete constructions;
- Bore-hole drilling for different purposes with diameter up to 520 mm and depth up to 300 m;
- Bore-hole drilling and deep anode bed installation with installation of electrochemical protection;
- Civil Housing Construction;
- Explosive Materials Production;
- General Contracting Works.

For all above listed activities special licenses have been issued by RosTekhNadzor (Russian Federal Service for Ecological, Technical and Atomic Supervision) to enable permitted usage of explosion-hazardous production facilities; manufacturing, storing and usage of explosive industrial materials, as well as certificates for specific types of works issued by self-regulating organizations which are valid in the RF and Certificates ISO 9001:2001 and STO GAZPROM 9001-2006.

HISTORY

Trust «NGVPS» JSC is a legal successor of Specialized Trust «Vostokneftegazvzryvpromstroy», founded in 1986 under the Order No. 357 dated 13/09/1986 by the Ministry of Gas and Oil Engineering of the USSR.

The Specialized Trust «Vostokneftegazvzryvpromstroy» was renamed as Mobile specialized trust «NefteGazVzryvPromStroy» in 1988.

The Mobile specialized trust «NefteGazVzryvPromStroy» was reorganized to Joint Stock Company «NefteGazVzryvPromStroy» in 1994.

The geography of Company's business covers Urals, Western and Eastern Siberia, North-West Region, Caucasus, Far East.

The company's experience includes participation in construction of many major state facilities in Russia and abroad: Macedonia, the Democratic Republic of Yemen. Today the production forces of Trust «NGVPS» JSC are involved into the major construction projects requiring blasting works for loosening rocks.

To ensure safety and quality of blasting works as well as to meet the requirements of the Unified Explosive Safety Regulations, Labor Protection Rules, Safety Methods Rules and Industrial and Ecological Safety Rules the Company employs highly qualified personnel having a great experience in mining and blasting works.

The Company celebrated its 25th Anniversary in 2011. Competent and forward-looking management policy, rallied work of highly qualified experts, and modern equipment are the key components of Company's success.
Today Trust «NGVPS» JSC occupies more than 15% of the market for drilling and blasting works. The Company has two affiliates, explosives production facility and representation:

- Drilling and Blasting Works Department (21 Ulyanovych St., 450112 Ufa, Republic of Bashkortostan, Russia, tel. (347) 242-65-36);
- Explosives production facility (26 Piket St., Aldan, Republic of Sakha (Yakutia);
- Representation in Neryungri (3/1 Timitskaya St., 678960 Neryungri, Republic of Sakha (Yakutia).

The Group of Companies «NefteGazVzryvPromStroy» include the following affiliates:

- LLC «Neftegazvzryvpromstroy» (address: 21 Ulyanovych St., 450112 Ufa, Republic of Bashkortostan, Russia, tel. (347) 242-65-36);
- LLC «Neftegazvzryvpromstroy-Vostok» (address: office 302-306, 25 Lermontova St., 677000 Yakutsk, Republic of Sakha (Yakutia), Russia, tel. (4112) 22-32-50);
- LLC «NefteGazVzryvPromStroy-Yug», (address: 10 Onezhskaya St., 620089 Ekaterinburg, Sverdlovsk region, tel. (343) 216-15-37/38);
- LLC «SpetsVzryvProm», (address: 20 A Podosenskoy Pereulok St., 105062 Moscow, tel. (495) 781-15-82/83);
- LLC «InterTEK», (address: 10 Onezhskaya St., 620089 Ekaterinburg, Sverdlovsk region, tel. (343) 362-36-96);
- LLC «NefteGazZhilStroy», (address: 21 Ulyanovych St., 450112 Ufa, Republic of Bashkortostan, Russia, tel. (347) 240-52-55);
- LLC Private Security Agency «NefteGazVzryvPromStroy-Otkhroma» (address: 21 Ulyanovych St., 450112 Ufa, Republic of Bashkortostan, tel. (347) 242-65-36);
- LLP «Vryvprom-2001», (address: 1 p. Tsentrny, Bakhash, republic of Kazakhstan, tel. (71036) 4-98-00).

Trust «NefteGazVzryvPromStroy» JSC governs the following dependent companies:

- JSC «Kubanvzryvprom» (address: 18 Fisanova St., 353900 Novorossiysk, Krasnodar area, tel. (8617) 61-17-08);
- JSC «Kurgantruboprovodstroy» (address: 24 Blyukhera St., 640000 Kurgan, Kurgan Region, tel. (3522) 24-63-83);
- JSC «AGROPROMPROEKT» (address: 12 Entuziastov St., 454000 Chelyabinsk, tel. (351) 265-68-08).

Major operations performed by the Group of Companies «NefteGazVzryvPromStroy» may be geographically divided as follows: North-Western Federal Region – 15%; Ural Federal Region – 22%; Siberian Federal Region – 8%; Far East Federal Region – 55%.

Trust «NefteGazVzryvPromStroy» JSC has its own park of specialized vehicles.
Loosening of frozen soil by drill and blast method when constructing the following facilities: "Gas pipeline-collector UPPG-UKPG-4 of the Anerayakhinsky development area at Jamburgsky Gas Condensate Field", development of Khavrutinsk field at Jamburgsky Gas Condensate Field, Expansion of gas transmission pipeline in Urengoy (JSC «Urengoytruboprovodvodstroy»), LLC «Yamburggazobycha»); Gas pipe-line «SRTO-Torzhok» (JSC «Lengazpetstroy»); Gas flow-line to cluster of Gas Wells N12 of Nakhoedkinsky field (JSC «Arktikneftegazctroy»); Pipe-line «Nakhodkinsky field GKS1-2 Yamburgskaya» (JSC «Mezhregiontruboprovodstroy»);

• DBW for North-European gas pipeline Gryazovets — Vyborg in Leningrad region in 2009-2010;
• Construction of underwater ways through the Ust-Ilim water basin, the Angara and the Lena rivers as a part of construction of "Pipeline system Eastern Siberia — Pacific Ocean", through rivers and the Baydaratsk Bay at the facility "Main gas pipeline system "Bovanenko-Ukhta"", as well as approach canal to the transshipping complex of the Vysotsky dork «Lukoil-2» by the Baltic Sea, bottom dredging when constructing terminals in Primors, Vysotsk and in other cities and towns.

Trust «NGVPS» JSC, has developed and applies advanced technology underwater DBW at the depth of 25 meters. The Company holds specialized drilling units and tools equipped with floating devices and employs waterproof explosives during working process. Underwater ways through the Ust-Ilim water basin, the Angara and the Lena rivers, the Baydaratsk Bay as well as bottom dredging (when constructing terminals in Primors and Vysotsk and in other cities and towns) have been constructed using new technologies.

Production forces of Trust «NGVPS» JSC are nowadays involved into major construction projects such as:

• Gas pipeline «Vankor – Khalmerpayutinskoe»;
• Northern European Gas Pipeline on the site Gryazovets-Vyborg in Leningrad region;
• Airport in Petropavlovsk-Kamchatskiy;
• Reconstruction of motorway «Kolyms» in Republic of Sakha (Yakutia);
• DBW in development of reserve N4 at 881 km of the facility «Reconstruction of motorway «Lena» at 849-880 km in Irkutsk region».

DBW are currently being performed at the following facilities:

• Testing and Industrial Quarry at Kekura field in Chukotka Autonomous District;
• Development of Vyalanginian deposits in Samburg oil and gas condensate field;
• Development of «Novogodnee-MONTO» field in Yamal-Nenets Autonomous District;
• Technical requirement of Oil Pipeline «Ust-Balyk-Kurgan-Ufa-Almetevsk» in the Republic of Bashkortostan.

• DBW in the open-cast mining quarries NN1, 2, 3 at the mine «Valunisty» in Chukotka Autonomous District;
• Wells drilling for electrochemical protection of main gas pipelines system «Bovanenko-Ukhta» and quarry development in the Republic of Sakha (Yakutia).

Trust «NGVPS» JSC holds specialized vehicles park which is constantly being renewed. The Company has all necessary vehicles and machines:

Drilling units Sandvik DX800, Furukawa HCR 1200, Furukawa HCR 1500, Randger-700, Strong SD-1300E, PANTERA 1100 and PCR; Drilling units URB 2А-2, URB -3 А-3, 1 BA-15V fixed on URAL, KRAZ, KAMAZ cross-country chassis; BТS-150, MBSh-421 on the basis of tractor T-170; Domestic compressors NV-10/8М2, PV-10/8М1; Imported highly productive compressors by Airmann, Atlas Copco; Mobile plants for explosives production.

A park of specialized vehicles with cross-country chassis was organized to transfer and to store explosives. It contains vehicles with KRAZ, URAL-IVEKO, FORD, Mitsubishi and GAZ cross-country chassis updated according to requirements of EX/III and European Agreement on international carriage of hazardous commodities (DOPOG), which can be used as temporary movable warehouses. Transportation of explosives is carried out by cross-country diesel-powered vehicles.

There are Company’s special storage deports for explosives in Ufa, temporary warehouses in the Republic of Komi, Sakha (Yakutia), on the Yamal Peninsula. There is also a Explosives production facility in Aldan, Republic of Sakha (Yakutia), with production power up to 24 tons per day of bulk explosives and up to 12 tons per day of packaged explosives.

There is a production base with area of 3.5 ha in Ufa.

Trust «NGVPS» JSC employs highly qualified experts with a great experience in mining and blasting operations.

The Group of Companies «NefteGazVzryvPromStroy» currently has over 1000 employees.

The Company’s enterprises are equipped with modern safety systems that ensure jointly with FSDP «Okhrana» and LLC «NGVPS-Okhrana» escort and protection of transported explosive materials (including the place where the works are performed).
TECHNOLOGIES APPLIED:

1. DBW for tranches when constructing main gas and oil pipelines and for various communication systems (water pipeline, electric line, communication line) including:
   1.1. Loosening of rock and permafrost soil in mountains,
   1.2. Loosening of rock and permafrost soil in protected zones of acting main gas and oil pipelines, power line and communications line,
   1.3. Underwater blasting works for loosening rocks when passing through water barriers of different depth and length.
2. DBW in quarries to excavate overburden rocks and minerals as well as controlled blasting to preserve walls of quarries, basins and excavations.
3. DBW for construction of motorways and railways including mountain areas.
4. DBW in industrial and construction sites with space-limited environment including operative departments facing tight constraints for flyrocks, seismic loads in protective facilities, blast effect on people and buildings and construction glazing.
5. Crushing and dissembling concrete and reinforced constructions including foundations by means of explosives;
6. Cutting by explosion to dissemble various metal structures;
7. Direct blasting collapse of chimney, demolition of reinforced-concrete and brick buildings and constructions to the foundation and in the intended direction.
8. Preliminary loosening of river ice cover by explosion.
9. Dredging underwater blasting works.
10. DBW for constructing tunnels and other transport facilities, for underground mining.
11. DBW production for deep anode bed.
12. Special operation in soil (water depression)

The Company is duly licensed and certified for all above listed operations and works by the Rostekhnadzor.
QUALITY MANAGEMENT SYSTEM

The fulfillment of the main QMS principals and requirements is analyzed and estimated during annual internal and external audits. Analyses of the audit results permit to disclose potential to raise efficiency of the Company.

Top quality of work and high skills of the Company’s experts are confirmed by the Certificate of Conformity received in 2008 after implementing and certificating QMS to meet corporate standard requirements of STO GAZPROM 9001:2006.

STO GAZPROM 9001:2006 requirements permitted to ensure execution of the fixed requirements to the labor safety, ecological and industrial safety.

The fact that the Company’s QMS is constantly being improved for the purposes of effective Company’s business management is confirmed by the awarding to Trust «NGVPS» JSC the following:
• Diploma of contest winner «the Best QMS», 2009;
• Diploma of a contest prizewinner «the Best products of Bashkortostan», 2009;
• Diploma of Third Degree and Cup of Competition for a prize of the President of the Republic of Bashkortostan for production (goods, services) quality, 2009;
• Contest Prizewinner Diploma «100 top products in Russia», 2009;

Should any necessity occur any other vehicles owned by the group of Companies «NefteGazVzryvPromStroy» will be involved into the production of the works. Total number of the vehicles is over 200 units.

The Company’s Top Manager was awarded with the medal of «All-Russian Project Expert “Effective Personnel Management”» in 2009.

Trust «NGVPS» JSC designates to become one of the leading specialized companies in Russia and CIS countries to perform DBW and drilling operations (ground, underground and underwater) when constructing main pipelines, motorways and railways, development of gas and oil fields and when developing mineral fields by open-cut mining.

Company’s development target is «to meet fully the customers’ requirements, to ensure competitive growth and to receive permanent income flow for further production development to the benefit of customers.

Maintaining and improving the certified QMS to meet the requirements of ISO 9001:2008 and STO GAZPROM 9001:2006 signify that Trust «NGVPS» JSC recognizes itself as a part of the market, seeks to win in the competition and accepts its liability to the DBW consumers.

CJSC «Holding Company «Soyuzvzryvprom»», being a part of the Group of the Companies «NefteGazVzryvPromStroy», has incorporated LLC «Beloretsky PARK» in Beloretsk, Republic of Bashkortostan, to erect dwelling houses made of LVL within National Priority Project «Affordable Housing» and program «Low-rise Housing Construction Development in the Republic of Bashkortostan “Your own house”». Dwelling house parameters comply with the Regulation No. 79 dated 27 February 2010 «On approval of methodical instructions related to the parameters of low-cost residential property» issued by the Ministry of Regional Development regulating housing construction using Federal budget funds.

LLC «Beloretsky PARK» deals with construction of houses and cottage settlements by individual and standard projects.

The Consumer may order both separate services and key ready wooden houses: foundation, roof, walls, windows, electric systems and engineering systems.

Production volume per year:
- over 54 LVL housing sets;
- 600 m³ of specialized moldings for repairs and construction;
- nearly 1500 m³ of window headers and LVL structures in trim moldings;
- 1000 pcs. of garden and park design elements;
- The company processes nearly 35000 m³ of wood per year;
- Desiccation of wood: 480 m³ per one process.
Trust «NefteGazVzryvPromStroy» JSC

CIVIL HOUSING CONSTRUCTION

Trust «NefteGazVzryvPromStroy» JSC deals with completion of production and administrative and housing infrastructure in gas and oil fields and mining sector (e.g. camps, administrative and housing complexes, hostels, industrial buildings).

«NefteGazVzryvPromStroy» JSC performs a number of works related to planning, manufacturing and construction of turnkey pre-fabricated and mobile buildings made of metal structures for different purposes: blocks and modules, hostels, two-storied dwelling houses, administrative and housing complexes, canteens, industrial buildings on the basis of Certificate of Conformity SRO-C-041-24092009 dated 13 January 2012.

The Company owns production division which produces block and module buildings with area of 3000 sq.m. per month, metal structures for different purposes (frame-panel buildings, communications towers, overpasses) up to 1000 tons depending of degree of complexity.

Completed projects:
- Featuring the well «Skalistaya» in Norilsk: administrative and housing complex for 150 people in 2009;

CJSC «Holding Company «Soyuzvzryvprom»

(20A Podsosensky Pereulok St., 105062 Moscow, Russia.
Tel./fax: (495) 781-15-82/83,
www.hksvp.ru, zaohksvp@gmail.com)

Closed Joint Stock Company «Holding Company «Soyuzvzryvprom»» (CJSC «Holding Company «Soyuzvzryvprom»») is a holding company that performs DBW of any difficulty level in construction of the main pipelines, oil and gas fields development, railways and motorways construction.

The Company performs nowadays DBW in rocks and permafrost grounds, in quarries, excavations when constructing pipelines, motorways; drilling of wells with diameter up to 520 mm and depth up to 300 m for various purposes; drilling of wells and mounting of deep anode beds with installation of electrochemical protection stations. The Company performs cutting of pipes, metal structures and containers as well as demolishes buildings and chimneys.

Our Company solves on tight schedule issues related to the organizational and material and technical support of preoperational stage that is required before the works and that allows us to perform the works all over the Russian Federation. Company's business geography includes Ural, Western and Eastern Siberia, North-Western Region, Caucasus, Far East.

ADVANTAGES OF COOPERATION WITH CJSC «HC «SOYUZVZRYVPROM»»:
- Great experience in DBW production;
- High mobility;
- Specialized equipment and vehicles park owned by the Company;
- Qualified experts having a great experience in mining and blasting operations;
- Quality, accuracy and safety of works.
JSC «Kubanvzryvprom»

(18 Fisanova St., 353900 Novorossiysk, Krasnodar Area,
tel. (8617) 61-17-08, fax 61-12-94, www.kubvzrivprom.ru,
e-mail: kvp-nov@mail.ru)

JSC «Kubanvzryvprom» was incorporated in 1923 in Novorossiysk to perform DBW in the Northern Caucasus and in Russia in general. Specialists of JSC «Kubanvzryvprom» reconstructed industrial and constructional facilities in the area. The most significant work was made for cement plant «Novorostsement». JSC «Kubanvzryvprom» performs unique blasting works for urban facilities including:
- demolition of seven-streyed buildings of the former spa resort «Rivera» in Sochi;
- FSUE «United Spa Resort «Sochi»;
- planning of sites, construction of ditches and trenches by drilling and blasting method when construction facilities of Kaspisky pipeline consortium.

All works are performed by qualified experts who have a great experience in DBW in the Southern Federal Region and Russia in general.
JSC «Kubanvzryvprom» performs the following works:
- DBW in stone quarries;
- DBW for crushing rocks and boulders;
- DBW in construction;
- Construction sites planning;
- Making ditches without bottom and walls being disturbed;
- Making trenches when constructing roads;
- DBW in confined spaces of populated localities and construction sites;
- DBW for buildings and constructions demolition;
- crushing foundations;
- processing metals by explosions and other types of works.

JSC «Kurbaland»

(24 Blyukhera St., 640006 Kurgan, Kurgan region,
tel. (3522) 24-63-83,
Web: oao-ktps.narod.ru, e-mail: office_ktps@infocentr.ru)

Nowadays this is the only company in Kurgan that is competent in construction of gas and oil industry facilities.
The Company mainly deals with following types of works:
- Featuring gas and oil industry facilities.
- Featuring internal engineering systems and equipment of the buildings and constructions.
- Protection of construction structures, pipelines and equipment.
- Featuring motorways and aerodromes.
- Construction supervision works.
- Arrangements for Gas and oil complex construction.
- Construction of Gas Supply Facilities.

There is a licensed industrial non-destructive testing laboratory.
The Company owns a production center (machinery and repair shop, storage premises, land plots).
JSC «Kurgantruboprovodstroy» is a multi-functional company. It performs, in addition to its main types of works, some orders related to logistic services: oversized and heavy cargos transportation when constructing gas and oil pipelines in Tyumen northern areas, Chelyabinsk, Sverdlovsk and Kurgan regions. Today our transportation park contains 74 automotive vehicles and 68 construction vehicles.
The Company was founded in 1970. Its personnel consist of experts having a great working experience. To improve quality and to upgrade professional skills the Company’s personnel undergo annually knowledge assessments and trainings. Experience, modern methods of production management, skilful economic policy, modern equipment, qualified personnel and strict control of works quality ensure stability and dynamics of company development. The Company owns well organized construction and transportation center, field test laboratory that allow the Company to perform major investment and construction projects and be competitive with the leading Russian contractors.

Main facilities, 2011–2012:
- Railway road «Ulak-Elga»;
- Vankor oil field;
- Mamontovkoe oil field.
JSC «AGROPROMPROEKT»
(12 Entuziastov St., 454000 Chelyabinsk, tel.: (351) 265-68-08, web: www.app74.ru, E-mail: secretary@app74.ru)

Starting the date of foundation in 1958 till present it is one of the leading complex project institutions in the South-Ural Region. The institution's personnel are presented by qualified human resources having a great professional experience that fact allows the company to feel confident in modern economic conditions and to manufacture competitive intellectual products, to implement new technologies. The institution holds comprehensive archive funds, modern equipment and certified program software. All type of works are duly certified and licensed.

High mobility allows the company’s personnel to perform the works in several regions of the Russian Federation at the same time.

At present the institution performs the following types of the project activity in deferent fields:

- Territory planning schemes development;
- Urban planning documentation development: e.g. General plans of inhabited localities, housing projects for micro-districts, separate areas;
- Engineering net systems planning: gas supply, heat supply, water supply and water disposal systems, communications and power supply systems;
- Constructions planning that ensure operation of the engineering infrastructure: boiler units, power substations, sewage treatment facilities, water extraction installations;
- Civil housing facilities planning including multi-storeyed sports and recreation centers, religious and culture constructions;
- Technical survey and re-construction of various existing buildings with delayed analysis of the structures and foundations;
- Full set of engineering and geologic, topographic and geodesic, hydro-geologic survey;
- Environment protection
- Technical measures planning related to civil defense and emergencies.

The institution participated and still actively participates in programs initiated by Rosatom (Russian Federal Atomic Energy Agency), Chelyabinsk Region Administration, food industry as well as in housing construction related to the renovation of the agricultural industry facilities, reconstruction of medical institutions.

The institution’s personnel contribute into production organization and development in various industries, construction of social and industrial facilities.
